

The Fantastic Four

CS 4900

APPLICATION OF THE SOFTWARE DEVELOPMENT LIFECYCLE

FALL 2025

REQUEST FOR PROPOSAL

Team: Fantastic 4

Members: Lukas Dawson, Azizbek Husainov, Jerico Corneja, Diego Sanchez

PROJECT OVERVIEW: The purpose of this project is to design and implement an application that will allow users to rate and review movies they have seen. Their reviews will be available in an easily accessible profile page. They will also be able to see reviews from other users on the pages for movies they view.

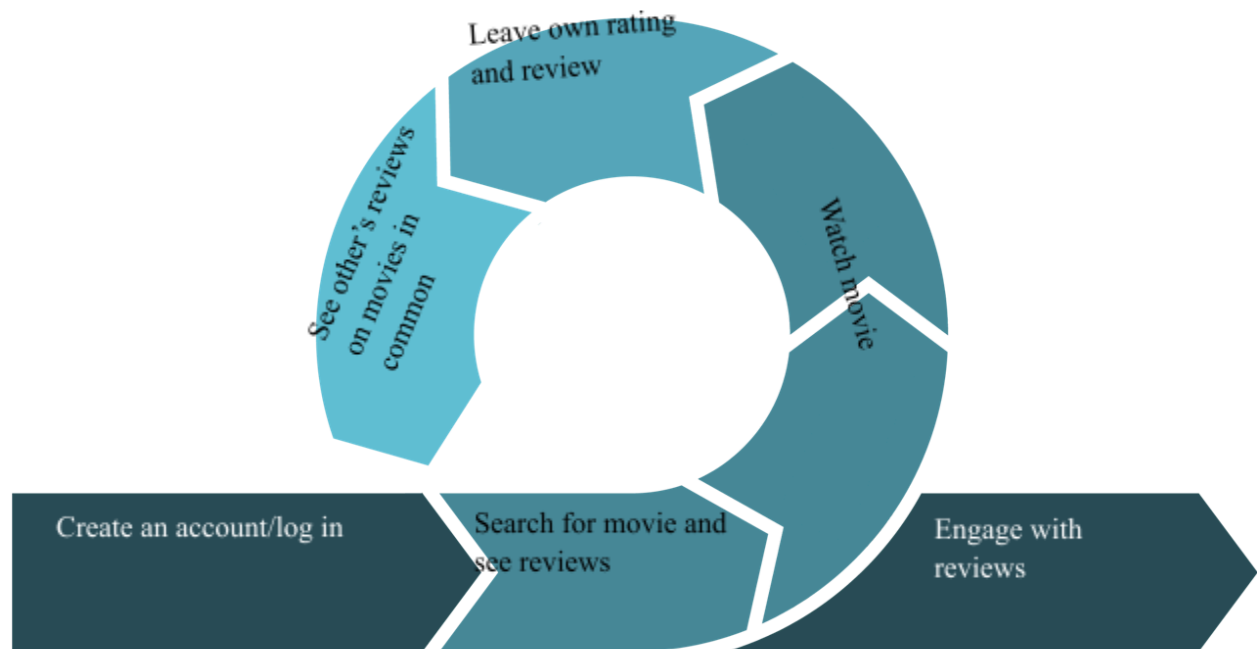

PROJECT DESCRIPTION:

- Allow users to create an account and log in
- Provide capabilities to look up movies from a database
- Give a rating system for users to decide on from 1-10
- It will have capabilities for users to leave a written review alongside their rating
- A profile page will be provided for users to view all of their reviews in an easily accessible format

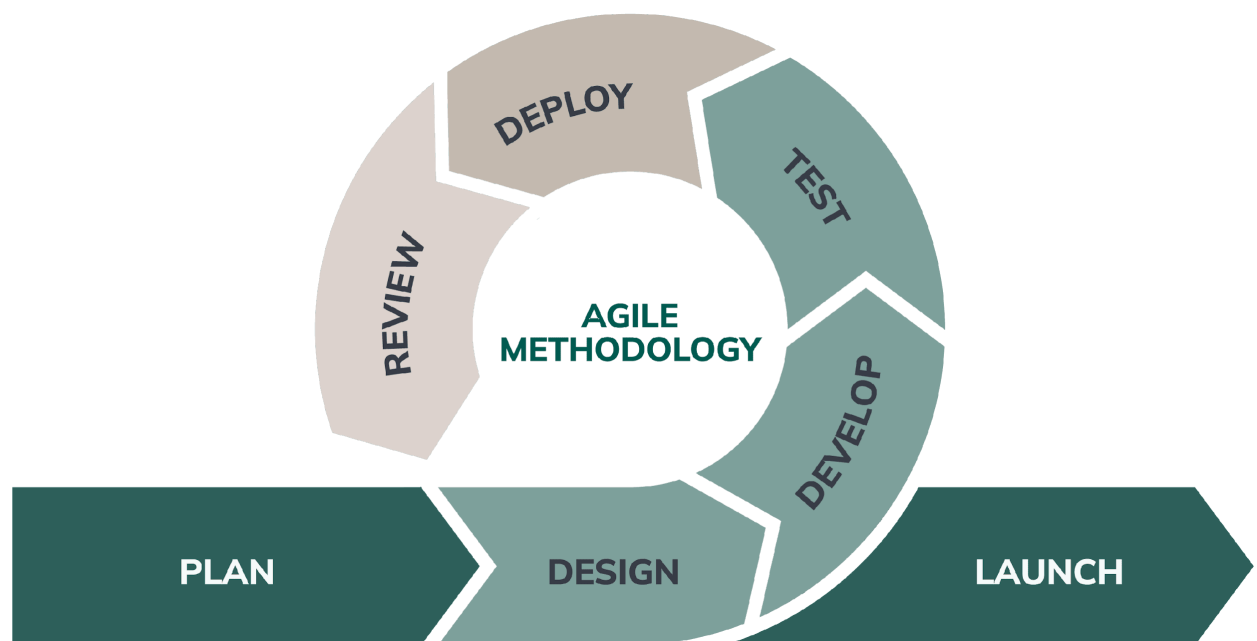

PROJECT GOALS:

- Store user account information for login
- Implement movie database API to allow users to search and find movies
- Create a rating system on a scale of 1-10
- Add dialogue box for users to leave a review on a movie
- Give the user a profile page where they can see all their movies together

MOVIE REVIEW APP DEVELOPMENT LIFE CYCLE

SOFTWARE DEVELOPMENT LIFE CYCLE

USER PERSONA

Age: 25
Location: Des Moines, Idaho
Education: Bachelor's in Communications
Job Title: Social Media Coordinator

Moe is a young professional who watches movies regularly on streaming platforms like Netflix, Hulu, and Disney+. He enjoys chatting with friends about films and often checks reviews before deciding what to watch. Moe wants a simple way to keep track of his own reviews while also seeing what others think. He isn't aiming to be a professional film critic, but he values having an easy and personal way to capture his thoughts after watching.

GOALS

- Have an easy way to view a movie's rating before deciding to watch it
- Quickly search for movies and leave a review with a rating.
- Keep all of his past reviews in one place to revisit later.
- Compare his opinions with recent reviews from other users.
- Discover how others reacted to the same films he has watched.

PAIN POINTS

- Big review platforms (like Rotten Tomatoes or IMDb) feel overwhelming and impersonal.
- No easy, central place for him to track all his own reviews.
- Difficult to see recent user reviews for movies he's already watched.
- Existing apps don't feel tailored for everyday movie fans like him.
